

CommercePayments™

AP Invoice Automation

Transitioning from manual to automated accounts payable can play a vital role in turning your Accounts Payable (AP) department into a profit center. Our consultants will help you uncover valuable benefits and cost savings that your company could gain with AP Invoice Automation, and they'll assist you in building a business case for implementation.

Designed to fit the needs of your organization, AP Invoice Automation can help your company:

- Create AP process efficiencies
- Reduce costs
- Eliminate paper
- Faster invoice approvals
- Maximize employee resources
- Improve visibility

Get bigger impact by automating invoices.

AP employees spend most of their time opening mail, checking invoices and tracking down approvals. Then after the payment is made, they must reconcile, file and store each one. Why not introduce automation where it can make the most impact?

AP Invoice Automation can include everything from invoice receipt to storage – electronically. This level of automation has a much bigger

impact on your business, even outside of the AP department. Employee work hours, physical storage costs, time spent auditing are all significantly reduced. And when one of your employees goes on vacation, it's still business as usual.

Ask us about a CommercePayments™ AP analysis to show you the true impact of automating your invoices.

The CommercePayments™ Advantage

Our team understands that your business comes with its share of challenges. We help you to anticipate, plan for and address those challenges by giving customized advice and recommending the right products and services based on your unique business situation.

We have high-touch, high-service strategists dedicated to empowering your invoice and payment process. But the AP business demands more and that's why our team of consultants make the difference in helping you uncomplicate the complicated.
