

Could your hospital benefit from a new revenue source?

CommerceHealthcare® is committed to helping Tennessee hospitals offset costs with ControlPay® AP Payments. Participating hospitals can generate a steady revenue stream simply by paying their bills through the Visa® Network.

With an Accounts Payable program through the Tennessee Hospital Association you will reduce check writing costs. You will also earn monthly revenue share based on an aggregate volume from all Tennessee hospitals that participate in this program.

Implementation made easy

CommerceHealthcare® will help you get your program up and running without interruption and also help you maximize your revenue share.

ControlPay® AP Payments provides the following advantages:

- Keep your existing banking relationships
- CommerceHealthcare® support teams help with file transfers, training and vendor enrollment
- Account Managers assigned for ongoing program evaluation to help maximize monthly revenue
- In-house Customer Service team based in Kansas City, Missouri

Here's what Cookeville Regional Medical Center has to say about Commerce Bank's Automated Accounts Payable Solution, ControlPay® AP Payments:

“Initially we were skeptical, and thought that Commerce Bank sounded too good to be true. But much to our surprise, it really is as good as they said! **Implementation was a breeze** with very little work required on our end. The ongoing maintenance is **simpler than any other form of payment** we use and our vendors appreciate the quicker and easier payment. The Commerce team is always available and quick to respond if we have any questions or issues. This has been an extremely effective and efficient product for us.”
