

# Facilities and Construction

Advancing spend management by maximizing the impact of every dollar spent

## Working together to manage spend

Vizient works with customers to develop strategic plans for capital, facility and construction spend management. Our solutions deliver the right capabilities at the right time, tailored to your needs and aligned with your goals.

### Leading expertise

Get expert service and support to develop, execute and manage strategic plans with confidence.

### Strategic sourcing

Establish custom contract pricing and performance improvements with custom pricing negotiations.

### Innovative technology

Gain insights with technology that allows you to understand and consolidate facilities spend.

### Spend Optimization

Gain visibility to third-party party GPO spend to increase price savings, nonprice value and incremental returns across high-value categories and products.

## Dollars saved, schedules met and expectations exceeded

Advancing performance by managing spend on facilities and construction is critical to long-term success. Our solutions, which use—data, analytics and expertise to help—Vizient® providers and customers save money, reduce costs and improve operational efficiency throughout operations. Our leading service model brings our experts to your experts, working together to develop sustainable strategies and gain tangible results for your organization.

### Spend Optimization

Construction project procurement of materials and equipment typically occurs by third-party partners for the customer, resulting in a lack of direct visibility to the purchase. Vizient Construction Spend Optimization solution ensures reported spend of Vizient contracted materials and equipment purchased by contract subcontractors and trade partners on construction projects is reported. The tracking and validation of purchases made by third-party partners maximizes the reporting of Group Purchasing Organizations (GPO) administrative fees. This work is performed by Vizient SMEs to ensure minimal impact to design and construction teams and doesn't financially impact the project, contractors or subcontractors.

### Facilities and construction

Move beyond acquisition price with a total cost of ownership approach to achieve the highest quality outcomes and the lowest operating costs. Develop strategic capital construction plans, cost-effective budgets and workflows tailored to your organization. Optimize use of materials, equipment and services by developing performance criteria and aggregate anticipated spend by introducing standards for efficiency and cost control.

Drive aggregation of spend and develop standards across your facilities to maximize savings and value. Get clear visibility into the cost of materials and third-party purchases to increase revenue and long-term savings. Complete repair, maintenance, renovation and new construction.

**From beginning to end, our experts work alongside your teams on design development, from schematic to construction design, as well as construction administration, procurement, activation and logistics.**
