Enhancing Healthcare Security with Confidence: Protecting Patients, Empowering Staff, and Fortifying Healthcare Facilities

## Our experts are here to help.

Our security consultants are experienced in operations, productivity, quality management, risk management, people and environmental safety, emergency preparedness, technology, and information protection.

Our experienced professionals are ready to collaborate with you and ensure that your organization has robust policies and procedures, well-trained staff, cutting-edge technology, and comprehensive support in place. Our goal is to help you establish a highly effective security management program that aligns strategically and culturally within your organization.

To learn more, please contact us at [securitysolutions@vizientinc.com](mailto:securitysolutions@vizientinc.com).

## Are you prepared to safeguard people, assets, technology, and your building against any security threats?

In today's dynamic environment, organizations face risks to their people, assets, and buildings. These risks impact loss prevention and brand reputation. To meet the demand for enhanced security solutions, Vizient offers comprehensive Security Consulting services. Our qualified consultants can guide you to success in this complex landscape.

## We provide a comprehensive security program review to help you strategize your security program.

One of the key services we provide is a comprehensive review of your security program. This review encompasses various aspects such as risk assessments, governance, leadership, culture, policies and procedures, education and training, security staffing utilization, and security system technology.

In addition, our consultants specialize in developing customized security programs tailored to address specific areas of concern. Whether you need assistance with active shooter situations, behavioral health challenges, environmental design, infant/pediatric security, information protection, loss prevention, medication security, lighting and landscaping, technology integration, or workplace violence prevention, we have the expertise to create effective strategies and protocols.

- Workforce productivity/ optimization: We conduct a thorough review of your security workforce matrix and activities to evaluate efficiencies and identify areas for improvement.
- Technology design/ installation/ integration: Our expert consultants assess your security needs and provide guidance on selecting, designing, and working with vendors to install, program, and integrate hardware/ software solutions that can optimize your staffing resources.
- Regulatory and Industry Best Practices: Security programs often intersect with various regulatory agencies and industries. Our consultants are well-versed in compliance requirements such as CMS, The Joint Commission (TJC), Det Norske Veritas (DNV), NFPA, Life Safety Code, OSHA, NIOSH, and the IAHSS guidelines. We provide recommendations to help you navigate these regulations and align your security program accordingly.

Whether you require a comprehensive assessment or a focused review, our assessment activities may include remote work sessions, site visits, onsite working sessions, interviews, group discussions, document review, and an environmental tour. Upon completion of the assessment, we will provide your facility with a detailed written report highlighting any gaps identified, along with a recommended action plan.

With our expertise and tailored consulting services, we can help you enhance your security program and protect your organization from the ever-evolving security threats.

As the nation's largest member-driven health care performance improvement company, Vizient provides solutions and services that empower members to deliver high-value services by aligning cost, quality and market performance. With analytics, advisory services and a robust sourcing portfolio, we help members improve performance outcomes and lower costs.
